Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 9-12, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grennan (fig.2).

Grennan shows all of the recited elements except the capacity of the generator 166. Sizing the generator would have been obvious to one of ordinary skill in the art according to the supply system size and the degree of peak capacity. Furthermore, the use of gauges, valves and appropriate controls are inherently necessary for the proper operation of Grennan.

Response to Arguments

Applicant's arguments filed 7/13/01 have been fully considered but they are not persuasive.

The applicant comments that Grennan compresses gas during off peak electricity utilization, that the distribution lines are not satellites, that the expansion and compression trains are both coupled to motor/generator 166, usage of motors and generators to control the compression stage of a system as well as the utilization of shafts and clutches is antithetical to the claimed invention because it results in expensive generation of electricity and fuel losses, that the compression is limited in time and the generation functions can operate only when the compressing section is shut off.

Art Unit: 3747

The examiner contends that the claims do not prohibit the compression of gas during off peak utilization and the usage of motor/generator with clutches to control the compression stage. The arguments of the compression being limited in time and the generation function operating when the compressing section is shut off are not germane to the claims. Grennan clearly indicates that there are a number of distribution lines connected to the transmission line. Each distribution line is connected via the expansion/compression system. The mere recitation of "satellites" is broad enough to read on the distribution lines.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
